

## Synthesis of Peptides Unit

### Access

To access the unit, contact the coordinators indicated on the page 12 of the dossier on CIBER-BBN Research Infrastructure on Biomedicine:

Scientific Responsible: **Dr. Fernando Albericio** [albericio@irbbarcelona.org](mailto:albericio@irbbarcelona.org)

Technical Coordinator: **Dr. Miriam Royo** [mroyo@pcb.ub.cat](mailto:mroyo@pcb.ub.cat)

### Rates

The rates given are per amino acid, scale and purity. The final price will be calculated according to scale, purity and number of amino acids.

Pureza	Crudo desalado	70%	75%	80%	85%	90%	95%	98%
10 mg	12.0	16.0	20.0	23.0	27.0	32.0	35.0	52.0
50 mg	25.0	30.0	33.0	40.0	48.0	57.0	61.0	92.0
100mg	37.0	40.0	45.0	60.0	75.0	90.0	102.0	147.0

Additionally, the rates for post-synthesis modifications are

<b>Acetylation, N-terminal</b>	<b>Free</b>
<b>Amide C-terminal</b>	<b>Free</b>
<b>Biotin, N-terminal</b>	<b>150,00</b>
<b>Biotin C-terminal via Lys side chain</b>	<b>300,00</b>
<b>Fluorescein N-terminal</b>	<b>240,00</b>
<b>Fluorescein C-terminal via Lys side chain</b>	<b>300,00</b>
<b>Acetylation Lys side chain</b>	<b>80,00</b>
<b>D-Amino acid</b>	<b>50,00</b>
<b>Lys (Ac)</b>	<b>80,00</b>
<b>Cyclation</b>	<b>250,00</b>

For peptides longer than 30 amino acids, higher purities than 98%, higher quantities than 100 mg or post-synthesis modifications not indicated in the table, consult the coordinator of the Unit.

**Final price for CIBER-BBN groups is 30% off.**
