

PhD in Organic Chemistry for the CUSTOM ANTIBODY SERVICE (CAbs)

WE OFFER:

- One year contract, renewable on an annual basis.
- We offer the possibility to integrate oneself in a dynamic research group and to obtain a multidisciplinary formation in the chemistry and biomedicine fields.

CANDIDATE PROFILE:

- PhD in Organic Chemistry
- Experience in organic chemistry with interest in bioanalytical assays
- Knowledge in HPLC, MS and NMR
- Good knowledge of the English language
- The candidate should be dynamic and willing to work in a multidisciplinary research group.
- Communication skills will be highly valued

MAIN TASKS:

- Design, synthesis and bioconjugation of immunoreagents for the development of antibodies and immunoassays
- Collaboration in the maintenance of the lab and contributing in the common tasks of the custom antibody service and the research group

Applicants should send motivation letter and curriculum vitae to:
