

U14. CELL THERAPY

Cell cultures	According to protocol
Flow Cytometry	According to protocol
Biomechanic evaluation of plantar pressure in large animal models	According to protocol
Analysis of Cytokines, Chemokines and Interferons	According to protocol
Determination of cytokine concentration by flow cytometry	According to protocol
Lymphocyte proliferation assay	According to protocol
Leukocyte Proliferation Assay	According to protocol
Measurement of Nanoparticle Effects on Cytotoxic Activity of NK Cells by Label-Free RT-CES System	According to protocol
