## QUALITY POLITICS

The Soft service belongs to the scientific-technical services of the Institut de Ciència de Materials de Barcelona (ICMAB) of the CSIC. This service is linked to the NANBIOSIS Singular Scientific-Technical Infrastructure (ICTS) through unit 6 (U6: Biomaterial Processing and Nanostructuring), and is directed by researchers from the ICMAB 'NANOMOL' research unit.

Management has defined the following **quality policy**:

- **The promotion of scientific and technological innovation.**
- **The motivation of the staff.**
- **Contribution to the formation of the technical staff.**
- **The promotion of continuous improvement activities**
- **The contribution in scientific and technical publications.**
- **Commercial, marketing and dissemination activities.**
- **Guarantee of the confidentiality of the services.**
- **The scope of UNESCO's sustainable development goals**
- **Commitment to comply with regulatory requirements**
- **The reach of maximum user satisfaction.**

This quality policy provides a framework for establishing and reviewing annually the quality objectives.
